

12 months was all they needed to take over Scientology

May 81: Sherman Lenske appears, claims to be the attorney of LRH

July 81: Mary Sue Hubbard is removed from the position of Controller

October 81: Sherman Lenske and others forms Author Services Inc (ASI)

November 81: Sherman Lenske and others forms the Church of Scientology International (CSI)

January 82: Sherman Lenske and others forms the Religious Technology Center (RTC)

May 82: RTC receives the trademarks

May 82: Sherman Lenske, Meade Emory and others forms Church of Spiritual Technology (CST)

Today Scientology is owned by CST.

Meade Emory is a tax lawyer who worked for the IRS in 1975-77

About 1975-77; it's during this time period when documents are stolen from IRS, the docs which appear with the CoS Guardian's Office. It's because of this "theft" that MSH is convicted and removed from the post of Controller. With MSH gone Lenske, Emory and others is able to take possession of Scientology

The following is probably true:

Sherman Lenske and Meade Emory were the ones who did it, by the order of someone (probably psychs) but these two gentlemen is the real reason behind the problems in the CoS. They made a deal with David Miscavige and brought him to power, outmanouvered LRH and MSH and they have been doing whatever they wanted with the CoS and its member since.

We are likely to find a psych connection behind Lenske and Emory.

The purpose was to stop Scientology, it was not money
